ePlatform Mobile App Major Update – IOS and Android

We’ve undertaken a major update to the ePlatform Mobile App and added numerous new features.

We’ll just highlight the changes you need to know. We’d encourage you and your colleagues to update the app on your device and spend some time exploring it.

The magnitude of the update necessitates your library members undertake the “Find Your Library” step again, to ensure a bug free experience.

The ‘Home’ screen shows you all the libraries you’re signed up for as well as any active loans.

Multiple libraries mean a patron/student can simultaneously access their school library and local public library, a very powerful feature.
We created shortcuts at the bottom of the page to simplify the navigation within the app.

‘Home’ takes you to the Home screen (see screenshot above)

‘Library’ shows the main page of your library (tip you can customise this page with the Custom Compilations feature)

‘My Loans’ shows the patrons active loans and loan history for this library

‘Browse’ allows you to select titles based on filters and subjects

Upgraded Reading mode below.

In ‘Reading mode’ you are now able to switch to full-screen reading with a centre-tap. With another tap in the middle of the screen, the menu will re-appear.

Quick access settings and navigation icons greatly improve access to common functions.
Audiobook Capability

This major update includes Audiobook capability. Library members are now able to listen to Audiobooks for the first time.

We have been inundated with requests for a cost-effective Audiobooks solution, and now we have it.

Please contact us to register your interest.

In ‘Play-mode’ you can Play/Pause the Audiobook as well as many other functions you would expect.

Many of your students and patrons are not tech experts so we’ve worked hard on a simple and intuitive interface, without cluttering the user experience with rarely used buttons and functions.

Audiobooks can be downloaded for offline listening, which is perfect for travelling, or downloading on Wifi instead of consuming limited mobile data. Settings are available to caution & limit data usage when on mobile data to help protect library members from unnecessary costs.

If you have any questions regarding the update, don’t hesitate to ask us for help or support either via our ‘Help Centre’ within the app or contact us per email: support@eplatform.co
